The Group's net debt position (loans minus cash and cash equivalents) stood at -€0.6 m (i.e., net cash of €0.6 m) compared to net cash of €82.1m as of 31/12/2024. The change since 31/12/2024 is attributed to the distribution of a dividend of approximately €32 m (€0.30 per share), to the payment of approximately €31 million for the acquisition of a 70% stake in Benrubi S.A. and to increased working capital requirements.

## H1 2025 Results per segment:

**Commercial Activity** (Info Quest Technologies, Quest on Line, iSquare, iStorm, Clima Quest,GED, FoQus, Epafos, Benrubi).

During the first half of 2025, sales increased by 12,4%, while earnings before taxes (EBT) increased by 36% compared to the same period in 2024. The growth in EBT is attributed both to the consolidation of Benrubi's results (as of February 1, 2025), and to the recovery of the air conditioning market, which performed better than the relatively weak first half of the previous year.

IT Services (Uni Systems, Intelli Solutions, Team Candi).

Sales augmented by 10,1%, and EBT by 8,9%. Demand for IT services remains strong, driven by the high number of digital transformation projects of the private and public sector. Roughly 50% of sales stem from international activities.

Postal Services (ACS Courier).

Sales remained at the same levels as last year, accompanied by a single-digit increase in earnings before taxes (EBT) of +5.3%, driven by improved company productivity. The growth rate of this business segment follows the trend of the e-commerce market, which showed limited growth during the first half of the year.

Renewable Energy Production (Quest Energy).

Sales were lower (-8,5%) due to unfavorable weather conditions and reductions in energy injection into the grid. Earnings before taxes (EBT) remained at last year's levels, mainly due to the reduction in borrowing costs for the companies within this business segment.

## Quest Holdings (parent company).

The parent company's revenue reached €11,9 m (€11m are coming from dividends from subsidiaries) compared to €15,8m last year. Earnings before taxes (EBT) amounted to a €11,5 m , compared to €14,3m in the corresponding period last year.

### Post balance sheet events

On August 8th, Quest Holdings subsidiary, "Quest Energy S.A.", signed a binding agreement with an International IPP (Independent Power Producer), a party not affiliated with the Quest group, for the sale of a part of its portfolio of fully operating photovoltaic plants located across various regions of Greece with a total installed capacity of 36,7 MW for a consideration of circa EUR 36 million on a debt free & cash free basis. This transaction is in line with the Group's strategic plan for optimizing its energy portfolio and further enhancing its liquidity.

The completion of the transaction is subject to any required regulatory approvals and the fulfillment of other conditions precedent. Quest Holdings will inform the shareholders and investors of the completion of the transaction in a new announcement.

### 2025 Outlook

The following outlook is estimated per segment:

- Commercial Activity: We estimate growth in sales compared to 2024. EBT is anticipated to experience a double digit growth compared to 2024.
- ➤ IT Services: Growth in both sales and profitability is estimated vs 2024, driven by a strong demand for IT services in Greece and international markets. The company's backlog (contracted projects to be executed) exceeds €700 m.
- **Postal Services:** A mild growth is expected in sales, with a pace similar or higher than the growth rate of ecommerce, and a higher profitability than in 2024.
- ➤ Renewable Energy Production: A slight decrease in revenues and profit before tax is estimated compared to 2024. The sale of the 36.7MW power parks is expected to be completed by the end of the year at the latest, an event that will affect the future performance of this activity.

In conclusion, for the full year 2025, consolidated revenues are expected to show moderate growth, while EBITDA is estimated to grow at a higher pace, confirming Management's initial guidance that it will exceed €100 m, along with an increase in EBT. At the same time, the Group's strong financial position and high liquidity enable it to successfully address any challenges that may arise, while remaining well-positioned to capitalize on potential opportunities.
